

REFERENCE

nnfinity was responsible for managing a Field Research Programme for a US-based university. The students of Northeastern University Social Enterprise Institute, located in Boston, MA, visited South Africa in July 2016 for a Field Research Program. This is a hands-on programme that focuses on social entrepreneurship and cultural immersion. To this end, we engaged the services of Xhosa Fundis for a morning workshop.

The workshop proved to be a highlight of the programme. The students thoroughly enjoyed the morning (in fact we regret not booking a full day workshop). The trainers, Mrs Nobuhle Mngcwengi and Mr Sibulele Magini, engaged beautifully with the students. They explained the Xhosa culture and language to them in such a wonderful way that by the end of the workshop all the students had given themselves clan names and were happily singing the Click Song.

I would like to extend my thanks to Pheliswa for all her very professional assistance and patience with the organisation - even with us changing arrangements a number of times. Xhosa Fundi's are a wonderful organisation and I would highly recommend their services. I will definitely use them in future.

Thank you.

Nicci Stewart

Executive Director: nnfinity
